SUMMARY

Associate Software Engineer with 1.5+ years of professional experience delivering full-stack web and mobile applications. Specialized in Next.js, React, Flutter, Angular, Python, and PostgreSQL. Track record of shipping SaaS platforms, ERP systems, and large-scale education portals. Passionate about scalable architecture, clean code, and building products that make a real impact.

EXPERIENCE

Associate Software Engineer

galvanai — 11/2025 - Present — Islamabad, Pakistan

Promoted from Full Stack Developer — AI SaaS platform development

- Engineered full-stack features for AI-powered SaaS platforms using Next.js, React, Flask, and PostgreSQL, with responsive Tailwind CSS frontends.
- Designed and maintained RESTful APIs powering seamless data exchange across AI, ML, and web services.
- Architected and managed relational and non-relational databases optimized for scalability and performance.
- Deployed and managed cloud infrastructure on AWS, supporting production-grade hosting and server operations.

Frontend Developer Intern

AIMS Soft — 01/2025 - 05/2025 — Islamabad, Pakistan

- Collaborated and enhanced Angular-based school management ERP modules, measurably improving UI responsiveness and usability.
- Delivered critical features on the Pakistan Education Portal, enabling streamlined student admission workflows at scale.

Flutter Developer Intern

Eziline Software House Pvt Ltd

07/2024 - 09/2024 — Islamabad, Pakistan

- Built production-ready cross-platform mobile applications using Flutter, Firebase, and REST APIs, following Material Design standards
- Implemented secure authentication flows and real-time data synchronization, ensuring consistent performance across Android and iOS

PROJECTS

Pakistan Education Portal

Angular | Commercial university listing portal; engineered the Apply feature enabling students to submit admissions directly on-platform

Collaborative Edge

MERN Stack | Real-time collaboration platform with live document editing, role-based dashboards, and skills showcasing for students, educators, and industry

Real-Time Chat Application

Flutter, Firebase | Production cross-platform chat app with end-to-end message sync, secure auth, and real-time messaging

E-commerce Website

React, Firebase | Responsive storefront with product listings, cart management, and Firebase-backed authentication

** (Additional projects and live demo's available on my portfolio website)*

EDUCATION

Bachelor of Software Engineering

National University of Modern Languages (NUML)

09/2021 - 08/2025

Intermediate (ICS – Computer Science)

Karlot Residential College

06/2019 - 06/2021

SKILLS

Frontend

NEXT.JS, ANGULAR, REACT, JAVASCRIPT, TYPESCRIPT

Mobile

FLUTTER, ANDROID DEVELOPMENT

Backend

PYTHON, FLASK, NODE JS, REST APIs

Database & Cloud

PostgreSQL, Firebase, SQL/SQLite, AWS

Other

C/C++, C#, GIT, MERN Stack

INTERESTS

App development / Web Technologies / Programming Languages / Emerging Tech
